RESUME

I'm a highly determined professional with a strong willingness to learn. My academic background provided me with a solid foundation in programming and sparked my interest in creating customized solutions. Since 2021, I have been deepening my knowledge and practical experience in web development, focusing on Front-End technologies such as React.js, Angular, and WordPress. Currently, I am expanding my expertise into full-stack development with ASP.NET, enhancing my ability to contribute effectively to project delivery. Committed to implementing innovative solutions, I constantly seek to improve my technical skills and make meaningful contributions to the success of the teams and projects I work on.

SKILLS

- C#
- ASP .NET
- HTML
- CSS
- JavaScript
- Java
- Wordpress
- Figma
- Git
- Node.js
- MongoDB
- SQL
- MySQL
- TypeScript
- Angular
- React
- Sass
- Azure DevOps

WORK EXPERIENCE

Software Developer – Solutions Analyst II

Capgemini Brasil

Jul. 2025 - Current

Software Developer – Solutions Analyst I

Capgemini Brasil

Apr. 2024 - Jul. 2025

This experience has been an opportunity not only to enhance my technical knowledge through courses and certifications, but also to strengthen my interpersonal skills by collaborating daily with a multidisciplinary team. Through challenging projects for the client Ágora Investimentos (Bradesco), I work as a full-stack developer using C# and ASP.NET, contributing on the front end by translating prototypes into intuitive interfaces, and on the back end by implementing and integrating new functionalities into the codebase. I am always committed to applying agile

development principles and best programming practices. This experience has helped me mature my time management, improve task prioritization, and add value to project deliveries.

Web Developer

Freelancer

Feb. 2021 - Current

In this experience, I learned to manage my time autonomously and to adapt to the specific needs of each client. Independent work allowed me to improve my communication and negotiation skills, ensuring a clear understanding of project requirements and efficient delivery of expected results. I utilized Wordpress, HTML, CSS, and JavaScript for creating websites for various companies across different sectors.

Front-End Developer - Internship

STTP - Superintendency of Traffic and Public Transportation, Campina Grande

Jul. 2021 - Dec. 2022

In this role, I acquired organizational and adaptability skills in dynamic environments, with a focus on Front-End development using Angular. I demonstrated proficiency in task prioritization, high productivity, and effective collaboration with the team. Additionally, my experience with Git enabled productive source code management.

My main responsibilities included:

- Front-end web development of CRUD systems and websites using HTML, CSS, Angular, TypeScript, Bootstrap;
- Back-end web development of CRUD systems using Node.js with mongoDB;
- Some adjustments in PHP codes;
- Git for project versioning.

Software Developer - Internship

Impulse Business Solutions, Campina Grande

Jul. 2022 - Oct. 2022

During my time in this position, I improved my communication and collaboration skills while working in teams to develop websites and CRUD systems using React and Wordpress. Active participation in the agile Scrum methodology enabled me to enhance my project management ability and meet deadlines effectively. Additionally, developing conversational flows using Zenvia Flow required a deep understanding of customer needs, strengthening my analytical and problem-solving skills.

My main activities were:

- Front-end web development of CRUD systems and websites using HTML, CSS, React.js, JavaScript, Wordpress
- Back-end development of CRUD systems using Node.js with mongoDB and MySQL databases;
- Creating website interfaces for various companies using Figma;
- Use of the agile Scrum methodology for project management.

EDUCATION

Bachelor in computer engineering

IFPB - Federal Institute of Paraiba, Campina Grande

Jan. 2019 - Feb. 2024

During college, I gained valuable knowledge in software and hardware development, learned fundamental concepts of programming logic and algorithms using Python, Java, and C in various contexts. I actively participated in team projects and study groups, which provided me with valuable interpersonal experiences. During my final paper, my focus was on evaluating the usability and accessibility of a mobile application for Multiple Sclerosis patients, solidifying my interest in human-centered software development.
